## User & Developer Guide

---

Published by C.F. Cheffins, Lith, Southampton Buildings, London, England, 1854 in Snow, John. On the Mode of Communication of Cholera, 2nd Ed, John Churchill, New Burlington Street, London, England, 1855.

(This image was originally from [en.wikipedia](https://en.wikipedia.org/wiki/John_Snow's_map_of_cholera_in_1854); description page is/was [here](https://en.wikipedia.org/wiki/John_Snow's_map_of_cholera_in_1854).

## Cover Picture

A variant of the original map drawn by Dr. John Snow (1813-1858), a British physician who is one of the founders of medical epidemiology, showing cases of cholera in the London epidemics of 1854, clustered around the locations of water pumps.

This image is in the [public domain](https://en.wikipedia.org/wiki/Public_domain) because its copyright has **expired**.

This applies to Australia, the European Union and those countries with a copyright term of **life of the author plus 70 years**.

## 2. Architecture

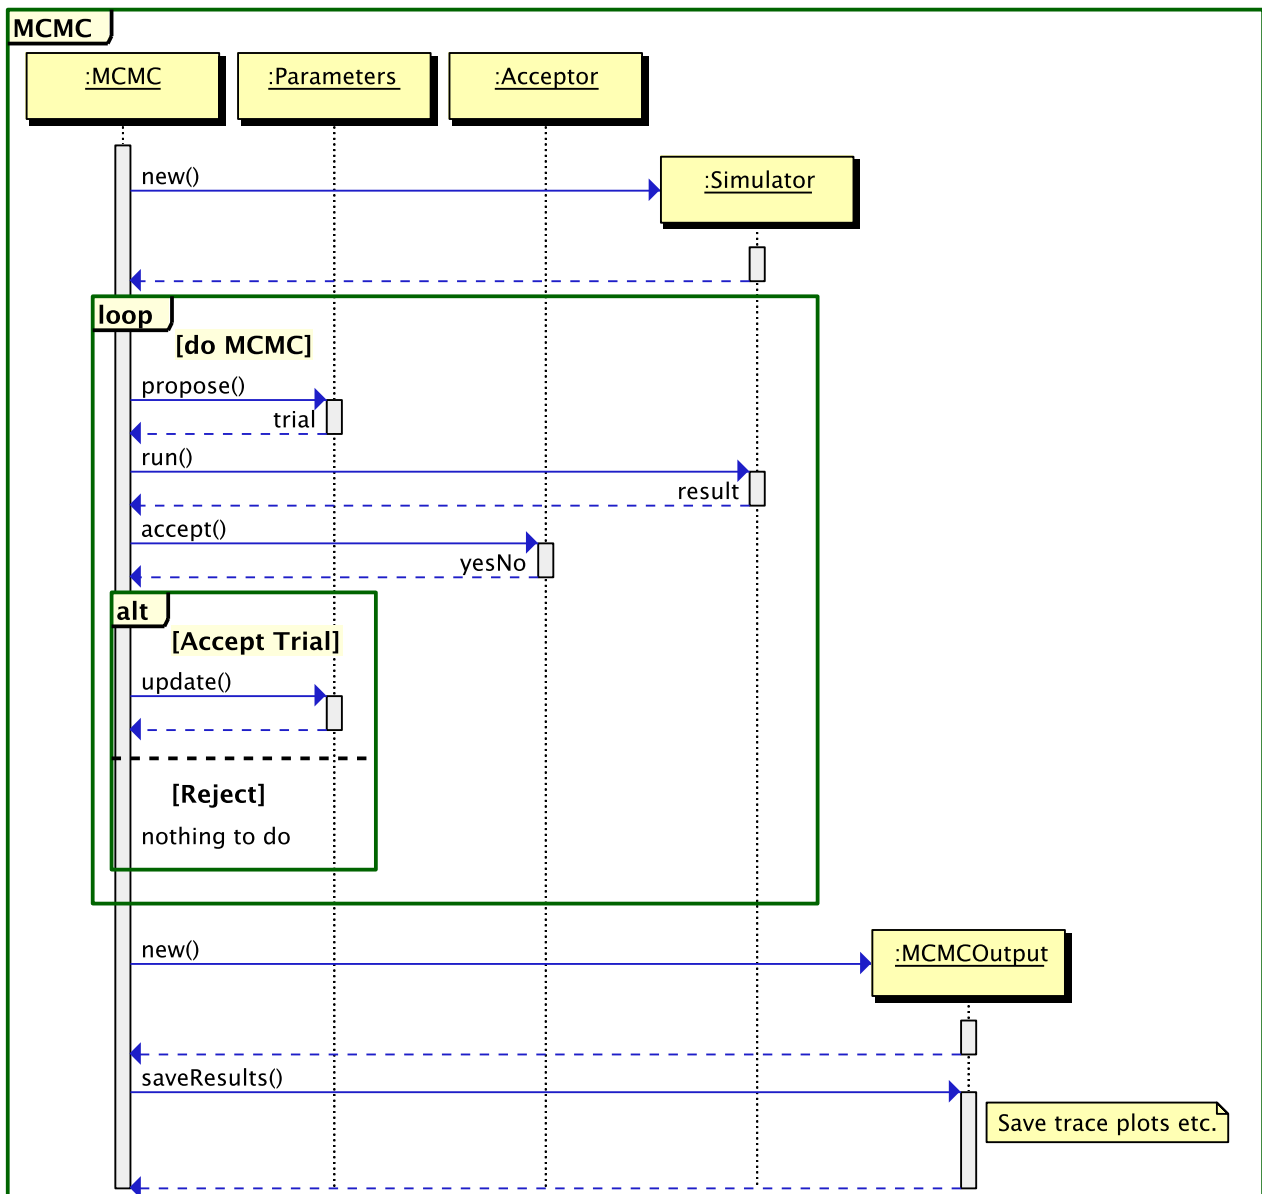

### Overview

### Simulators

(Markov Chain) Monte Carlo

### 3. Writing Models

## 4. Tips

To avoid `NullPointerException`s use Guava's `Preconditions` as in the following examples. Here the state of a field is checked (in a concise way) to determine if it is not null before being used and in the second example, the method arguments are checked.

```
public void doSomething() {  
    checkState( field.isPresent(), "Argument is not initialised" );  
    doSomethingMore();  
}
```

```
public void doSomething( List<Object> list ) {  
    checkArgument( list != null, "List must not be null" );  
    checkArgument( !list.isEmpty(), "List must not be empty" );  
    doSomethingMore( list );  
}
```
